

Forces of Light and Darkness.... Ahknaton....Joseph.

Paul Solomon Reading 9135. Japan-2/25/87

Question I: What kind of karma have I brought from my past lives to this life? Why do I have to reincarnate in this world at this time? What is my mission in this life? Please teach me some of the main karma, the process that I have made them in the past lives and how I should cope with them in this life.

Answer 1: "For always the servant, and never again the served."

You were a prince in Alta and ruled during the period when the Light and Dark forces were so clearly in combat with one another. And as they developed the great prism, which did not refract the light into colors but focused the light into a purity of a stream of light, most comparable to what you call in this time a laser. Now the focusing of that light was used for power in many different ways, including its use as a weapon.

Now it was not your responsibility in particular that there was a seeking among the forces in that time for greater and greater power in the earth. The karma of that experience might be expressed in this way: You were consulted from time to time concerning the use of the power of the crystal, but you were not in that time a scientist. You did not understand a lot about the use of the prism, nor were you sufficiently informed about the rancor between the Light and the Dark Forces, for many there were in that time to appeared to be servants of the Light, but in their hearts had a lust for power.

The karma, then, does not suggest that you repay for the activity of destruction which occurred in that moment. You were indeed not the person in particular responsible for that focus of power. Let us say more specifically here that the ruling forces, ruling in the most literal sense, not for royal heritage, but because of their ability to bend and shape the minds of others. And while they were also scientists...we mention these names that it might become more clear. That one who finally focused the prism to such destruction of the ancient world was Adolph Hitler. He was accompanied in the fight for power by such forces as seen in Truman, in Nixon, in Kissinger, but also.. and this is the pattern that we ask that you see, notice, for the other was Hirohito.

The Prince in this time was not a man who wished harm to the world. He was in this time as you were in that, a member of the royal family, wishing only love and peace, benevolence to the subjects, but he allowed the men of war to operate the machine of war, and in doing so gave up a major part of his responsibility.

Now we mention this figure so that you might have a shadow, a suggestion of the difficulty of your position in Alta, for it was so similar to the position of the Emperor of Japan in this more modern time. And again, neither of you, neither in that time nor him in this time, neither of you wished to cause on earth the two greatest calamities which have occurred in known history. But the similarity was that you both rose above the fight, but did not focus your responsibility in such a way as would have stopped the carnage.

Now further we wish to point out that in this intervening time, from Atlantis to the world today, you have participated many times in the course of history. And the karma which came from that failed opportunity to have intervened in power, not as is said, a sin of commission, but a sin of omission. Because of your realization that having been in a place of power you had not used it effectively, and so in your consciousness you turned yourself from the server, the Master, to the servant, swearing within yourself that never again would you be served by others. But a deep and profound commitment in the heart to be rather the servant than the ruler.

It is important that we establish awareness here that the karma from that experience, karma in a negative sense, does not remain, having been repaid in the intervening time. Then while we mention that karma, we also bring to your attention that the karma has been balanced, neutralized, in the sense of having repaid.

Then, a challenge of today is the responsibility to be a servant, but also to receive acknowledgement of your power, particularly in allowing yourself to speak and to teach among people. For your tendency in this project of bringing to these people a center for enlightenment, your tendency will be always to serve in the background. It is easier for you to serve than to be served for the practice in so doing since that time.

Then the step that we recommend here in development of the project of teaching enlightenment is that while you have great ability to arrange logistics as it were, you also have a great ability to communicate, to teach. You will tend to shy away from the opportunity to stand before the people and to teach the refinements or fine points of the Mysteries. For as ...(Name)... can bring the determination and the presence of responsibility, even royalty, he has his gift to give and will teach well. You have as well an experience. In your mind, having foresworn in Atlantis not only to transform from served to servant, but also you committed yourself to know, to understand the Laws governing that instrument which was used for ultimate destruction. You committed yourself then to building the mind of a scientist, and that interest in science, the commitment to understanding the containment and the release of powers in the earth, these were the thoughts of your soul, your Higher Self as you shaped your life in the returns upon this earth. You have built into your mind the ability to assist in preventing in this time such a disaster as occurred in that.

This then will cast some light upon our interest in the production of energy in the earth in this time as in that. The primary difference between the instrument of destruction in that day and the instruments given into the hands of men in this day...

As the crystal was used to capture and to transform power, it was used to collect and distribute the greatest power available to earth, the power of Light. That crystal was the ultimate invention of man to concentrate and release power. In that sense, was more than effective, for it did take the powers of the Universe, draw them to a particular point on earth in that time, and release them for whatever purposes were sought by man in that time.

Then, the scientists of this period, not including yourself, but the scientists upon whom you depended in that time to be responsible for the machine they created... your naivety in that time was a part of what allowed scientists, mechanics, if we can say it that way, to be responsible for

the greatest focus of power on earth, instead of taking that responsibility as a part of the ruling family....

And you find yourself in this time. In this time with an invention somewhat similar in some ways. But do understand this for yourself. We are not suggesting that you devote your life to science. We are rather suggesting that you devote your life to Light, and that in making your mind available to the world in this time, you commit yourself to understand this highest principle of energy responsibility on this planet. You must be one of the voices which will point out to science itself as an industry, to point out that the instrument of use in Atlantis was a gatherer of positive power of Light, which in its gathering of power from the Universe did not destroy anything for the release of power. Thus it might be said it was operated by positive power rather than by negative power in the sense that is used today.

In all forms of science, from the automobile engine to that of nuclear power plants, all of those, all of those use the principle of destructive power. The highest of the minds of scientists in this day believe that the only way to make power available for use on this earth is to destroy those concentrations of power which manifest themselves in the natural earth.

It is observable that the greatest powers on earth are not result of nuclear fission. Look into the volcano, into the earthquake, into the storm, and realize, all of these forces are concentrations of great power, and if you could save a life which might be destroyed by volcanic action, if you should save a life by harnessing that power, that it respond positively rather than destructively, you will have served science in a great way. But we are not suggesting that you dedicate your life to gathering the power of a hurricane or volcano or earthquake. Instead, make your mind a fine-tuned instrument for the purpose of comprehending that power may be produced and released for use on this earth without destruction, for all power which is used, which is produced by the instruments of destruction, all power produced in this manner is dark force power. And so you have an earth today dominated by the powers of the dark or evil forces.

Now, as you move into a position of teaching people concerning the

Mysteries, it is not enough that you gather a few people as has been done here in these weeks for a workshop to teach techniques such as meditation and prayer. Those things, the teaching of these sacred tools among men, this is vitally important. A step beyond this teaching of man to discover and to express the Divine through himself, a step beyond that is the challenge of blending your mind with the minds of others, keenly focused enough to understanding and to reveal the principle of positive focusing of power as opposed to the principle of releasing power through destruction.

Now, it is a restriction, which has been placed upon us since that day, that we are not allowed to unravel for you, to give you the finished work of the formula for this positive release of energy. We can tell you about it. We can tell you just this much and no more:

That the secret of the formula is hidden within the equation six by six by six. We are aware that such an equation or formula is completely occult to your thinking. It gives you not much to investigate the forces and to teach them. Only a piece of observation of the positive expression

of energy in the universe, should you look at it. Just keep those numbers in mind and allow your mind to grow until it can comprehend that expression of life, not only upon earth, but in the solar system. That is as much as we may say concerning that particular matter. We will give you just this much more of your incarnations and purpose regarding that which you have asked and how it was formed. We will skip several incarnations from Alta to the bringing of these secrets to the rest of the world after the time of destruction.

Move forward again, for there is one piece of your soul's history that is very important in this time, one more piece in addition to that we've already give.

At the time when Ahknaton succeeded to the throne, just before his great commitment to the One God, during the period when the priests of Egypt had allowed themselves to become compromised, the priests of Egypt had created a similar energy to that energy which occurred when you were a prince. But you returned this time as a scientist of Egypt, and we must explain the application of that term for the priesthood of Egypt in that time was the responsible expression of science, though different from your current understanding of the relationship between science and religion, this is because the Science of Religion has not yet been completely restored. We suggest then that within the period of the Schools of the Mysteries of Egypt, the initiates were the scientists of that day. These scientist/initiates - priests of Egypt had reached among themselves a similar lust for power, similar to that of ancient Alta. And in that period, there entered into Egypt one who had been betrayed by his own brothers.

So much here to understand and your utterances of language so incapable of communicating what we insist upon communicating to your heart. You will have to rise above the ability to think and into the freer air of the ability to understand as a result of attunement to the power of the One God. For the twelve brothers, the very Twelve initiating experiences of mankind, having moved from the positive expression of man in Alta into the giving up of man as Adam to be betrayed by the Twelve Power Points, the Twelve Power Sources of life, that which should have served man in that time, that which was a support to mankind became the power of his destruction in Adam. And Adam then was the first of mankind, the first of mankind using a physical body made of the clay of the earth.

He was the first of the initiates to rise out of clay bodies made after the time of that destruction. It was the physical body that was invented, if we can say it that way, in ancient Alta, was invented by the darker forces of power, the taking up of clay from the earth and shaping it into a body which could be used for labor. This was the invention of the Dark Forces. This invention, then, of the Dark Forces to capture, to capture even innocent beings - this prison of flesh invented by these men, became the instrument of incarnated gods betrayed by the principles which allow man to be alive. And thus the first of the compassionate initiates to put on such a prison body was Adam, who in his commitment to rise above the prison, was in fact the Anointed of God, God's own Son, who determined as a being of Light to enter the vehicles created by the interests of darkness. His commitment to enter into the prison, but make it free by overcoming the bonds of the prison, this was the choice of the Christ who had no need in

Himself to enter the earth to overcome karma or any such principle, but rather volunteered for the salvation of others to take upon Himself the prison of clay.

We do not expect that you will understand these principles all at once, but do pray to grow into the understanding of them.

Now, that betrayed one, betrayed by his brothers, entered into Egypt, and you have access to the story as it is told, but for this one piece. You were a servant of the Pharaoh, a manpower of sometimes military application, but as well with the priesthood, a scientist of Egypt as we have referred to it. Now, in the struggle for power between the priests and the young Pharaoh, into that struggle for power, you were introduced, you were attempting through your love for the young prince, you were attempting to champion his cause that he might become an initiate.

Now the priests with lust for power were attempting to keep the initiate/prince candidate for initiation, the priests attempted to keep him "in the dark," as you would call it, and in your attempts to serve the Pharaoh, the priests discovered that you were not quite aligned with their purpose and they intervened to have you put in prison. And it was while you were in prison in that time that the man of Israel, Joseph, was cast into prison as well, and you met him there. You met him there among the other prisoners and in your meeting him, you saw Christ, you were introduced to Jesus.

We mention that because your beholding Him in that ancient time has marked your soul so that if you considered all of the religions and sciences of the earth, there would still be this remaining point that your mind would insist upon. And that is to have central to your heart the figure of Living Love, the Christ incarnate. Because you saw Him in an ancient lifetime, your soul has been marked, sealed to His service so that in this time, even without knowing the Mysteries, you still recognize that the incarnation of the Mysteries was Jesus the Christ. After thirty times of living on this earth in the prison of the flesh, this Lord of Lords, this power above power of men, the Master of Masters became in that thirtieth expression the quintessence of initiation, of mastery, and of realization of Himself to be the incarnation of God.

Now study these Mysteries that we set before you and don't allow the naive who would like to impress the people of the world, do not allow them to indiscriminately print and send out and publish the lessons we have spoken to you. But let it be discussed and understood, and in wise measure be allowed to come to the knowledge of other.

Now that is the knowledge that we are allowed to pass at this time, and we must conclude. We are through for the present.
