

## Paul Solomon

Paul Solomon was a Meta-Human, a remarkable man who lived his life in service to exemplify and teach the ultimate possibilities of human potential. He was highly acclaimed as a prophet, sage, lecturer, philosopher, counselor, minister, magician, psychic and miracle worker. He was lauded as one of the most dynamic and insightful teachers of our time as he lectured around the world, touching and helping to transform the lives of hundreds of thousands of people.

The son of a Baptist minister, Paul was steeped in the Bible from early childhood. He attended seminary with the goal of following in his father's footsteps as a minister, but a shattering personal experience forced him to leave his studies. Five years of rebellion and depression followed until a powerful mystical experience changed his life forever. The experience took him beyond the limiting realm of the five physical senses into the Separate Reality of a Higher World.

He was catapulted instantly into new life, a new relationship with God, and a new ministry. He spent the rest of his life studying, learning, and teaching what he called Inner Light Consciousness, a guided experience in spiritual evolution, and from that he developed other related lectures and workshops. His goal was to help people find their own Inner Light without having to go through what he did to discover their potential. He encouraged the development of a close, personal relationship with God, the Source of our being, a relationship in which we can confidently ask questions and receive answers whenever guidance is needed.

Paul was unique in his ability to explain complicated concepts in clear and precise language that is easy to understand. His teachings still are practical and applicable to everyday life. His topics cover a wide range of knowledge and experience and include soul growth, altered states of consciousness and awareness, ancient mystery traditions and arcane knowledge, comparative religion, Sacred Scripture, Qabalah, Universal Law, holistic healing and many other facets of human existence. His workshops in personal transformation, including Unconditional Love, Emotions Mastery, Effective Communication, Loving Relationships and others, go beyond behavior modification to produce lasting change that occurs within.

Paul's love of the Bible grew and he could make the stories come alive. He received a doctorate from the New Seminary of New York City. Over the years, he shared podiums with such luminaries as Elisabeth Kubler-Ross, Sir George Trevelyan, Buddhist Priestess Tamo San, Dr. Jerry Jampolski, Buckminster Fuller, Barbara Marx Hubbard, Founders of the Findhorn Community Peter and Eileen Caddy, Jean Houston, Sun Bear, Manly Palmer Hall, Marcus Bach, and many others.

In his later years, he expanded his work to help the less fortunate. After serving as a volunteer with Mother Teresa in India, he formed the organization Dignity International. For his efforts particularly on behalf of the enslaved children and refugees of Thailand, he was nominated for the Nobel Peace Prize in 1993.

Paul brought together people of diverse nations, races and religions, honoring all of life and transcending boundaries. He empowered people to express their full potential. As said by the Paul Solomon Source:

"There is only one power. It is the power of Life. It is (your) purpose and commission to establish that the power called Life, Love and Light is a force with more available energy than all of the power associated with destruction and death. If this simple truth can be established in the minds and hearts of even a few people so that their brain-minds will be reconstructed, building a crown of enlightenment, this unified mind will discover (the hidden truths) of the universe. Then we will have established a firm foundation for the manifestation of the Higher Mind throughout this planet. People will bond together with the commitment to Love as God loves and thus bring peace and harmony to your world."

(Paul Solomon Reading #9014- W- 30- G- 40- SH, Virginia Beach, VA, 2/7/83)

Paul Solomon died in 1994, leaving behind a wealth of information and instruction. We of The Paul Solomon Foundation feel privileged and honored to carry on his work.
