

School of the Prophets, The Mystery School

Paul Solomon Reading 0664 - WK - 0030 - GR - 0022 - AL, Virginia Beach, VA, -7/--/75

The "School of the Prophets," like unto Carmel, has been born. You have seen in this time of sharing a part of that embryo, that pooling of consciousness, that will become the "School of the Prophets," and some of you here will be a part of it, will grow in consciousness with it, and will serve among those people until He comes...

That which was born in the past grows now and begins to take form. It has not entered yet your heart, your consciousness, that the Master intends to do in this place beyond your fondest dreams or wildest imagination. He will attract to this place those who served Him through generations, and in times and dispensations past. He will gather to this place those who walked faithfully with Him in that day. You will see a time when this area will see the feet, the footsteps of all those faithful, not only of the Twelve, but of the Seventy as well who went out. They will gather in this place, rub shoulders, and fondly carrying the message of the Gospel, will go again to all parts of the world teaching in the Name of the Master.

Look after one another. Be a family, and with the strength of the love of a family, hold together steadfastly, for you will need the strength of one another....

Let your light so shine among men that they will recognize your good works and see your Father who is within.

Paul Solomon Reading 9390 - WK - GR - SH - Virginia Beach, VA 07/18/91

This seminary as you have seen it at work here, is only the very first small step in the establishment of a true Mystery School.

And we would caution you in these things. Careful of those who are critical of their experience here during this time. Because of this we have given two things here. We have given a seminary which most think should be run very smoothly, and on time, and by a schedule, with no upsets, with a nice manual, and instructions, and telling each person what to do. The staff should be predictable and, of course, perfect, and meeting all schedules and teaching things as are convenient for those who came to study.

Hogwash! This school has been as perfect as we intended it to be, for there have been upsets of every kind for every person in this school. They have been challenged by what they see. They have been instant to judgment and condemnation. They have been disappointed. They have fallen by the wayside. They have not kept schedules they are asked to keep. This is the Mystery School. Welcome to the Mystery Schools. They have not even recognized when the lessons were self created. They have not picked up the broom and the mop. They have not picked up the responsibility for making the school what it is.

And every Mystery School throughout time, you will find if you will study them, that every Mystery School throughout time was established by the students, and the teacher simply threw out a challenge, walked away and told the students, "If you can't make the schedule and keep the schedule, and keep the place clean, and keep orderliness and these things in order in your life, then this is not a Mystery School. You are not to be students, hand fed, milk fed, bottle fed, by perfect teachers. This would make you absolutely incapable of ordering you own life."

Understand what we have done here. It has been beyond even the capacity of these students to plan, beyond the capacity of these teachers to plan lessons so perfectly as have been presented to the people who have come here. And, if they do not discover the broom and the mop, if they do not clean the floors and the walls, if they do not reconstruct the sanctuary in the building, if they do not set in order the processes of office work, and the publication of the newsletter and even the funding of the school itself,(Who has taken responsibility for that?) and the putting of the word out there to draw in. And have they sat down to prepare to move their experience into the next level of the Mystery Schools that those who come in this next year, in the beginning of the year, will have the firm foundation that was established by these? Or shall they all go out disappointed believing that the teachers here have not done a good job? It is not possible, for the teachers of this school are unseen. They teach through these who have been the servants, especially, this Hierophant of this school. And the resistances that have come have surely been the resistances brought along by those not prepared to meet the changes and challenges. This has been a kindergarten of the Mystery Schools.

Now, it would be a purpose for you to attend the seminary as it develops, to help it in the development, to be a part of its establishment, to be a pillar of this school, for there will be pillars of this school. And the pillars are those who hold up the structure, who establish this work firmly on this earth. For this school is not meant to be located simply in Virginia Beach. Only a hub is here which will reach out to the sacred sites of the world and will establish here, and there other schools that are part of the network right around the world.

It is intended, though it may not be accomplished, it is intended of these records that the next established school will be in Japan. Now, if the Japanese fail to the challenge, the baton will be passed on, and the establishment of the school, then, may be in England or in Australia. It could be in Ireland. If these who go out from here are sufficient to plant the staff, remember from the American ending in time, the power staff, that was thrust into the earth as what? An acupuncture needle into the earth, so that the man of the power pole, walked the path that was traversed by the animals. And where the paths, the ley lines followed by the animals who were attracted to the magnetic rising of energy from the earth, where they crossed in their paths, the power pole was thrust. Thus, the energy of the earth went vertically in the same manner.

Hear this. As the Shekinah over the tabernacle, and there they laid a wheel around it of twelve spokes, for the twelve colleges. And there they built a counsel lodge about the power pole. And so you have seen that.

Now, if those going out from here plant a power pole in Ireland, there can be a branch of the Mystery School there, but, it can only be built by partners, full partners of Paul Solomon. Not just committed students, though they must be that. But partners as well. Partners who will say, "Your debt is my debt. Your problems are my problems. The establishment of the school is as firmly my responsibility as it is the responsibility of Paul Solomon."

When will come the day when the students attracted to this school will say of this Hierophant, "Sit down, do nothing more than teach and write for the rest of your life. Do not go out to gather money. Do not go out to organize this and that and handle these and those questions and make decisions for everyone else's life."?

When will come the time when there is the giving to the school rather than the taking away, the taking away, the taking of the way until there is nothing left of this Hierophant? We have put him here for a purpose. His ability is to teach and to channel, and for those who doubt his channeling, understand this. We have established it such that when the words of the suggestion are said by this conductor, this man has no choice but to leave his body, and his consciousness is gone, and those who speak are the witnesses to the power of Christ, those who have lived through the ages, guided over by the angels, and even they are not allowed to misread. Unless a mistake is made in the speaking, the speech mechanism in operating that, sometimes there is a kind of dyslexic speak and a mispronunciation of words, but only that. This one is not capable of delivering a reading from his conscious mind or even tainting it with his conscious personality. We feed him the ideas, perhaps all day before a reading, but in the reading itself it is delivered by those who read from the Akasha.

We have sent him here for a purpose. Now he may be crucified by those who call upon his energies and use him for every other purpose under the sun. But he is meant to sit and speak and teach, to give the words that are eternal life and to let those go out from here who will be the disciples. Seventy, going out two by two. Twelve, going out to the corners of the earth, to twelve power points about the earth, and these responsible then for the Seventy.

How many will come from this seminary program this year? Will it be two or four or one? These things always are up to the will, the personal will, of the students. Unless they be sufficiently inspired to pick up the staff of responsibility and to go with it.
